APDL

AIRLINE PILOT LOGBOOK FOR FAR 117

90 DAY FREE TRIAL

COMPREHENSIVE FAR 117 LEGALITY

APDL provides the complete FAR 117 picture required by airline pilots including cumulative lookback, acclimated status, theater awareness, WOCL, Duty, and Rest. Colored "lozenges" provide visual cues as well as an Alerts area, iOS Notification Center integration, and status messages as legality is continually monitored.

WHAT-IF LEGALITY CALCULATOR

As your schedule changes use the What-If calculator to react to changes and forecast legality compliance.

INTERACTIVE TRIP SHEETS

Airline pilots live by trip sheets so APDL follows this paradigm as your logbook. Color coded data shows scheduled vs. actual vs. completed. Tap legs to view or update including auto night calculations, crew logging, and payroll assignments.

AUTOMATED LOGGING

APDL can log your flights automatically with only a flight number, scheduled out, and departure fix. Cloud resources will fill in your OOOI, Airports, and Aircraft automatically and also inform of gate info as it becomes available. Auto Night will trigger automatically.

SCHEDULE IMPORTER

Included in your APDL suite is NC Software's powerful cloud based schedule importer supporting over 200 trip formats. Process in-app or on APDL.net - your airline pilot portal.

CONFIGURABLE STATUS BOARD

Add/Remove widgets in various flight phase modes to show information as you need it. Interactive widgets show cumulative limits, legality status, current flight, gate info, sunrise/set info, etc. Tailor to your needs.

DYNAMIC RESUMES

APDL includes several commonly used resume formats and automatically fills them in based on your logbook.

DATA EVERYWHERE SYNC & BACKUP

Sync across all devices with data backup protection.

TRIP SHEET: Familiar trip sheet format for quick and understandable information at a glance.

LEGALITY: Complete FAR 117 coverage as the app continually monitors and alerts on legality issues.

STATUS BOARD: Customizable board to present information as you want it. Interactive widgets.

SCHEDULE IMPORTER: In-App or APDL.net trip processing for quick loading of your schedules.

WEATHER MAP: View weather radar and tap interactive markers for TAF/METAR and FAA Delays.

MONTH VIEW: Navigate your schedule with monthly Calendar or Schedule (List) Views.
